PRINT RESOURCES ASSIGNMENT 1: REFERENCE RESOURCES, DEWEY DECIMAL CLASSIFICATION, & PERIODICALS

Why, why, why???
People often ask why print resources are needed. They ask “can’t you just find everything online?”

In many cases, that is possible but… there are a number of unique reference items that have not been placed on the web.

Also, there may be a time when you do not have access to the web (for example, during a power outage) or just need a quick answer to a question. In these cases and more, print materials can be very useful resources.

Reference resources are meant to be used to look up a fact or get an overview of a topic. They are usually not meant to be read “cover to cover.”

Part 1: Reference Resources

You will need to visit the reference area of the library to complete Part 1 of this assignment.

To answer the questions, you will need to: 1) provide a definition to the identified reference resource, 2) find an example of this resource, 3) list the Dewey call number, and 4) answer a question using the resource.

The “Definitions for Commonly Used Terms in FYE 101,” found on page 37 of your handouts booklet will provide helpful information for the different types of reference sources.

The Dewey Decimal call number will be found on the spine of the book. The call numbers are used to organize the books on the library shelves. Dewey call numbers organize the books by subject. An “R” is placed in front of the call number for resources found in the reference area. Here is an example:
R 641.234
L123l

There is also a listing of selected reference resources (along with Dewey Decimal call numbers) in the handouts booklet that can help you locate these resources in the library.
