The Art of Leadership

by George Manning

158.4 M283a

The Art of Leadership, Fourth Edition, is more than a textbook; it is a "learning" book that actively involves the reader in the learning process. The text combines behavior theory with business practice to teach critical concepts and skills in leadership development. In addition self-evaluation questionnaires and practical exercises are integrated throughout to facilitate personal development and class involvement.

It's enough to make you sick: the failure of American health care and a prescription for the cure

by Jeffrey M. Lobosky

362.10973 L799i

More and more Americans are finding themselves without health insurance or with coverage that is so inadequate they face financial ruin in the event they actually get sick. So they go without. Their children don't receive their immunizations. They allow that worrisome lump in their breast to grow so large that by the time the cancer has been detected it has spread beyond the ability to cure. Seniors can't pay their heating bills or sustain adequate nutrition as the rising cost of their prescription drugs compels them to make difficult choices. Just how did our system become so dysfunctional and who is responsible? This book will tell you.

Socially ADDept: teaching social skills to children with ADHD, LD, and Asperger's

by Janet Z. Giler

San Francisco: Jossey-Bass, 2011

371.904 G463s

Socially ADDept provides an easy-to-follow program for parents and educators to teach kids with special needs the hidden rules of social behavior. Unlike other social skills programs, this acclaimed approach teaches children to see themselves as others do—covering everything from body language and being a good listener to dealing with teasing—demonstrating clearly what kids need to do to "fit in." Designed to be used with children aged eight through thirteen, Socially ADDept deciphers the complex rules of nonverbal language into friendly, bite-sized morsels that kids can understand and addresses the most common social errors made by children with special needs. The author breaks the social skills training into ten lessons that can be taught as sequential building blocks.
