New Vocabulary Emerges In Halls;  
As Tech Students Meet SC Students

Algebra, geometry, prospectus, design, dimensions, shop sketch, analytical geometry, and a whole new vocabulary is heard on the third floor at Spencerian, The third floor houses classes of the Louisville Technical Institute, a division of Spencerian.

The fifteen, day school students attending Tech are studying Architectural, Mechanical, and Civil Design Drafting. The nine-month programs are designed to prepare graduates to enter the fields of drafting, design drafting, and engineering technology.

FIELD TRIPS PLANNED

During their nine-month design program, students will take advanced drafting design, drafting design, physics, analytical geometry, trigonometry, and calculus. The challenging curriculum will be supplemented with field trips to U.S. Steel, the Logan Company, and the Bear Company. Recently, Bruce Lafferty, a representative of the Bruning Company spoke to the class.

Institute Announces Dumbaugh Founders Award Plaque

In the fall of 1974, when the Louisville Technical Institute graduates its next group of Engineering Technicians, the outstanding second-year graduate will receive the George Dumbaugh Founder’s Award.

The award, which will become an annual event, is named for Louisville Tech’s founder, George Dumbaugh. Spencerian’s Executive Director, Harry Weber, said, “George’s dedication to the principles upon which Tech was founded and his devotion to the success of each man entering the school lead us to begin this award in his honor.”

A large plaque will be designed and placed in the Tech offices, and each year the name of the recipient will be placed on the plaque. A special individual plaque will be presented to the outstanding second-year graduate.

A committee made up of evening school Director, Marc Brown, George Dumbaugh, one other faculty member, and one student will determine the criteria for selecting the recipient. These criteria will be announced in the next issue of Techni-Talk.

Jack Howard, the instructor for the Tech classes has seven years’ experience as a draftsman. His experience includes being a draftsman and checker with the Logan Company in the Power Conveyors Department, and drafting in the Architectural Department at U.S. Steel where he reworked all standard drawings. He also worked for the Armor Elevator Company and the Ryan Company as a draftsman. Mr. Howard attended Western Kentucky University and has taught at Jefferson Area Vocational School and Louisville Tech. He continues to gain experience in drafting and design by doing free lance work in the field.

Tech Graduates Employment Records

JOHN MORRISSEY  
Architectural Draftsman  
Anderson Wood Products

BOB BELL  
Mechanical Design Draftsman  
Ward Engineering Company

JEFF BLANTON  
Mechanical Design Draftsman  
American Air Filter

GARY RUNYAN  
Mechanical Design Draftsman  
Seamco Conveyors

BOB YOUNG  
Mechanical Design Draftsman  
Seamco Conveyors

PAUL RAY  
Conveyor Draftsman  
Ziniz Incorporated

GARY VAUGHN  
Structural Draftsman  
Steel Fabricators

MARK LEDGERWOOD  
Mechanical Design Draftsman  
Borders Engineering Company

STEVE B. RAY  
Mechanical Design Draftsman  
Rex-Chainbelt

ROGER OTTERBACH  
Inside Salesman  
Westinghouse Electric Corporation

JIM WATERBURY  
Apprentice Draftsman  
Steel Fabricators

TONY Zoeller  
Mechanical Design Draftsman  
Armor Elevator Company

THOMAS KAELIN  
Mechanical Design Draftsman  
Transportation Engineering Service Co.

KENNY TATE  
Mechanical Design Draftsman  
Transportation Engineering Service Co.

LARRY KAISER  
Mechanical Design Draftsman  
Rex-Chainbelt

DANNY COLLINS  
Architectural Draftsman  
Hass Construction Company

LARRY BENHAM  
Detailed Draftsman  
Vulcan Hart Corporation
