Radiology students benefit from recent expansion day. Both Spencerian’s Limited Medical Radiography diploma and Radiologic Technologist associate degree programs experience the CR system. The Radiologic Technologist students must pass the exams that now include CR and DR systems on their national examination administered by the American Registry of Radiologic Technologists (A.R.R.T.). Training they receive in the CR lab should be reflected in excellent scores on that exam.

Students learn from the best! The six full-time and five adjunct faculty are members of A.R.R.T. and are registered techs. Ms. Mary Kaye Griffin, Department Chair, is registered both as a Radiologic Technologist, and Mammography Technologist. She holds a bachelor’s degree in Health Occupations Education and is pursuing a master’s degree in Human Resources Education.

Spencerian students are placed in more than 30 clinical sites and are monitored by medical personnel who have contributed many combined years of experience and dedication. These clinical sites partner with Spencerian College and provide practical hands-on lab experiences for Radiology students. Many graduates are hired by their clinical sites, and the Graduate Employment Services statistics for 2006 (see page 5) reflect 100% employment of Spencerian’s Rad Tech graduates.

The students learn the names of various instruments and surgical procedures. Students learn every phase of sterile technique, including learning to do a surgical hand scrub, and gowning and gloving of each other and the surgeon. The students learn the names of various instruments and how to pass and use them.

Spencerian’s Surgical Technology program prepares students to work in the operating room and to assist with surgical procedures. Students learn every phase of sterile technique, including learning to do a surgical hand scrub, and gowning and gloving of each other and the surgeon. The students learn the names of various instruments and how to pass and use them.

Proper positioning is essential to achieve good results. Here Luis Miranda-Bermudez uses the tape measure to determine whether he has the correct distance for the x-ray.

We chose Spencerian!

Mike Blainford: “I want to further my career ... and I’m taking the RN program online... I know that’s a great college... I also listened to Stephanie graduated in 2007.”

Craig Rodulfo is a graduate of the Practical Nurse program “and now working toward my B.S.N. degree.”

Phyllis Johnson: “I want to be a Surgical Technologist and choose Spencerian because of the great reputation.”

Jessica Rappai: “I’m a nursing major and have been going to Spencerian’s great program.”

Japane Park just graduated from Doss High School “I want to be a nurse... and Spencerian offers me the fastest way to become one.”

Bibi Jo Leonard: “I’ve always wanted to be a nurse... and Spencerian offers me the fastest way to become one.”

The operating room - Spencerian style

Students learn every phase of sterile technique, including learning to do a surgical hand scrub, and gowning and gloving of each other and the surgeon. The students learn the names of various instruments and how to pass and use them.

They also learn how to draw up medications, load and pass and cut suture, hold retractors, and put dressings on. In addition, students learn how to set up for a surgical case in a timely manner. Spencerian students benefit from the one-on-one instruction they receive in class and experience every aspect of proper operating room procedure. - well almost everything - there’s no blood!

Massage Therapy is the newest hands-on program

massage pathology and holistic health by Dr. Axel Dell, who recently joined the department.

Great employment opportunities

In a recent issue, Entrepreneur Magazine listed the Top 500 Franchises for 2007 and Massage Envy was number 149. This rapidly growing franchise is now moving into Louisville, Lexington and the surrounding communities, making massage very affordable for the area consumer. The medical community has also stepped up its hiring of massage therapists to give patients the option of a non-invasive wellness and rehabilitative modality. The spa industry, one of the largest employers of massage therapists, has seen tremendous growth in recent years. Baby Boomers who are seeking ways to stay active and healthy have discovered that massage is effective and pleasant.

Spencerian’s Massage Therapy Diploma can be completed in only nine months during the day or in 15 months in the evening division.

Amanda Simpson: “I’ve heard good things about Spencerian and want a career in Massage Therapy program.”

Lisa Stabe: “I’m a single mom with a 15-month old... and I’m taking the RN program online... I know that’s a great college... I also listened to Stephanie graduated in 2007.”

Christie Buck just graduated from Spencerian and redid math and science and now is working in the Surgical Technology program to advance my career.”

Mike Blandford: “It was the best program! I got to learn and change fields and chose a career that I was passionate about... I chose Surgerical Technology because I’ve stressed the importance of education to my children and I want to be a role model.”

Chastity Rudolph: “I’ve stressed the importance of education to my children and wanted to be a good example... I chose Surgical Technology because I liked a hands-on career but am not afraid of blood and are quick and smart. The floor all my kids!”
