Spencerian College has a top-notch Accounting program. Three levels of Principles of Accounting are taught, one level of Accounting Analyses, Payroll, Cost Accounting, two levels of Income Tax, and Quickbooks (an Accounting software). The Accounting programs include subjects such as English, Math, Business Law, and Management, etc., giving Spencerian business students the tools to perform very well when they enter the workforce. Spencerian's Accounting graduates can earn certification in Accounting through the Accreditation Council for Accounting & Taxation. Instructor Del Hoskins presides over a two month preparation prior to students sitting for this exam. Plus, the College's Accounting Advisory Instructor Del Hoskins presides over a two month preparation prior to Payroll, Cost Accounting, two levels of Income Tax, and Quickbooks (an community to keep Spencerian current with any new trends in the Board is comprised of graduates, faculty and members of the business

Taking care of business: Accounting program adds up to success

Spencerian student saved her Mom's life

It seemed like such a simple task when alum Mary Pat McCallister helped her son lower the flagpole at their Indiana home. But when the rope broke, the flagpole had to be taken down to restirng it. During the process, the pole leaned into a 7200 volt power line, instantly electrocuting Mary Pat. Her daughter, Stephanie Anderson, a Spencerian Radiologic Technologist, instantly electrocuting Mary Pat.

Stephanie credits Mr. Saunders for teaching so well that she could perform CPR almost automatically in her panic.

Phlebotomy

Phlebotomy is an invasive procedure that is made to look easy. Students who take the Phlebotomy Course gain the theory and the practical skills necessary for preparation, collection and processing biological specimens for the laboratory testing.

Upon completion of this course, the student will: follow universal precautions in specimen collection and handling; properly collect laboratory specimens; process samples according to standard operating procedures, have knowledge of CSL standards according to phlebotomy; and follow the concepts of quality assurance and quality control.

Medical Microbiology

This course is designed for nursing and other Allied Health professionals and is intended to introduce the student to the basic concepts and practices of Microbiology, especially with regard to health and human disease.

LPN to RN Bridge Class

This class facilitates the transition from the Licensed Practical Nurse to the Registered Nurse role, examining the different responsibilities of each. Students reflect on their own experiences and personal goals with their future in nursing. Students learn Gordon’s functional health patterns across the lifespan, the nursing process, teaching/learning process, ethical/legal considerations, effective and therapeutic communication skills. They also learn the complete medical terminology.
