Students and faculty on campus are incredible too

**Public Speaking**
Left to right, James Felty, Deborah Clemons and the irrepressible Associate Professor Jeff Stone.

"This class is awesome; it's helpful in my field of study as it gives you the skills that this class offers." James Felty, Paralegal

"I chose Sullivan because of the small campus and classrooms. I'm a single working mom so the flexible schedule and the weekly school breaks make a big difference. This is by far the best school I have attended." Deborah Clemons, Medical Office Management

**Medical Assisting**
A "sticky" situation
Alexandria Sales and Lindsey Walker prepare to practice injections.

Shaye Wilson practices her injection technique on an orange prior to working on an actual person.

"Shaye is an amazing student! She impresses me beyond measure. She is always willing to help and go the extra mile for her classmates. She truly is an asset to the Medical Assisting program." Brenda L. Roe, Medical Assisting

"All the staff are very friendly and helpful. I love the tutoring lab and taking advantage of Plus Fridays. I chose this field because I enjoy helping and educating others. What better way to do that than helping people take care of themselves?" Alexandria Sales, Medical Assisting

**Pharmacy Technician**
Students learn the job responsibilities required of a pharmacy technician. They also learn about pharmacy law, pharmacy calculations and commonly-prescribed medicines.

Left, instructor Lisa Middlebrook works with Tiffany Thomas.

"Sullivan is different from my previous experience at another university. The class structure is more fluid. There isn’t a lot of attention directed towards using your education in the real world." Tiffany Thomas, Medical Assisting

**Computer Applications**
Associate Professor Sharon Babers assists India Allen.

"Sullivan is different from my previous experiences at another university. The class structure is more fluid. There isn’t a lot of attention directed towards using your education in the real world." India Allen, Medical Assisting

**Culinary Arts**
Chef David Walls works with Graham Thomas on his cooking techniques in Basic Culinary Lab.

"The program is challenging and intense, but most importantly it is fun! I have learned a great deal about the culinary industry and my personal confidence has increased immensely." Ebony Tucker, Culinary Arts

**Early Childhood Education**
Read me a story...

"Early Childhood Education students have opportunities to practice story reading skills. Incorporating an entertaining presentation with developmentally appropriate extensions on key learning concepts embedded in the story is a delicate balance that takes practice," stated Laura Weathen, Department Chair.
